

Continued Care Program

Laboratory Products Sales can now help you take the worry out of regular maintenance, performance verification, calibration and record keeping with our exclusive Continued Care Program. This worry-free program guarantees that your pipettors will work properly and stay calibrated for one full year. Every pipettor in your facility will be initially calibrated and certified and then be re-certified after six months. The reports generated from this program will be supplied to you in a binder for easy access and record keeping.

By enrolling in this program, LPS will inventory your pipettors by serial number, create a log to document calibration dates and arrange a convenient pick up and delivery schedule that won't interfere with your workload. If needed, we will loan you pipettors for use while the work is being done. Our exclusive Continued Care Program has been designed to give you the confidence to focus on your work by letting Laboratory Products Sales worry about the accuracy of your pipettors.

To contact us for complete details on this exciting program, please click [here](#) to fill out the form requesting the program.
