

Valid through June 30, 2025

- 🖉 Ready-to-use 2X, single tube master mix
- High accuracy; early detection with low ct values
- Superior sensitivity; Ideal for low copy number templates
- Proprietary intercalating green fluorescent dye for A minimal PCR inhibition and optimal fluorescence
- qMax Probe: compatible with popular hydrolysis & A beacon probes
- 🔗 Available with Low or High ROX dye. Also available without ROX

gMaxT M Green w/ Blue **Tracking Dye**
